

We are looking for a

# EXPERIENCED SERVICE TECHNICIAN

To handle client visits across Zealand.

## About the job

Do you want to be part of the team that the biggest pharma customers love to work with? And help create machines that solve manual, difficult, and inefficient processes? Now you have the chance. Our customers in Zealand deserve even more attention, which is why we are looking for a colleague to service them.

## Your tasks

You will service the largest companies in Zealand – and by that, we mean the biggest players in pharma and medtech. 8 out of 10 days, you'll be at the customer's site performing troubleshooting and maintenance on automated production equipment or participating in final FAT and SAT alongside your cross-functional project team. The remaining time will be spent behind the screen (either at home or in Hobro).

## You will also:

- ✚ Handle preventive maintenance
- ✚ Perform repairs (e.g., in case of breakdowns) and order new hardware through Purchasing
- ✚ Be the customer's go-to person
- ✚ Focus on aftersales when you spot a need
- ✚ Prepare documentation once the task is completed
- ✚ The tasks are varied, and you'll have plenty of opportunity to shape the role yourself.

## It's not the Robots...

...but the colleagues who keep our machinery running. That's why we make sure everyone thrives – both at and outside work. You'll get a flexible work arrangement, and if you want a 4-day workweek, that's fine with us. Plus, you'll receive training in robotics technology and continuing education when needed.

## Who you are

- + You have a background as an automation technician, automation technologist, electrician, robotics technician, marine engineer, or similar
- + You have experience with maintenance and updates of automated production equipment
- + Perhaps you know PLC programming and robot programming
- + You have worked with electrical panels
- + You are fluent in Danish and proficient in English (documentation is in English)
- + You can perform systematic and structured troubleshooting

We imagine you live in Zealand or Funen so you're close to customers. If you live in Jutland, we have a house in Kalundborg where you can stay.

## Who we are

At Technicon, we are driven by the ambition to create intuitive and user-friendly automation solutions for the pharma industry. We believe the best results come from the interaction between humans and robots – and, most importantly, from collaboration among dedicated colleagues. We are a team of curious, passionate specialists who value teamwork, knowledge sharing, and collective success.

Here, your ideas have room to grow, your skills are taken seriously, and you become part of a strong interdisciplinary community where professionalism and humanity go hand in hand. We don't just create unique solutions for our customers – we create a workday filled with job satisfaction, personal development, and professional pride.

## How to apply

You can apply by sending a traditional application and CV – but if you prefer a video application, that's very welcome too. Please send your application and CV to: [application@technicon.dk](mailto:application@technicon.dk)

We're conducting interviews on an ongoing basis, so don't wait too long to get in touch. If you have any questions about the position, feel free to contact our HR department at +45 29161012 or email [ldv@technicon.dk](mailto:ldv@technicon.dk)

We look forward to hearing from you!
