

We are looking for a

## MECHANICAL DESIGN ENGINEER

### About the role

Technicon is looking for a Mechanical Design Engineer who can contribute to concept development, design and manufacturing of special machines and robot systems. Depending on experience and competencies, you will either be responsible for the mechanics of the entire system or parts of it. At Technicon, we work in interdisciplinary teams, and we work project-oriented. You will therefore be able to follow the entire project process and finally see your constructions take shape in our own workshop.

### We need one who can help solve the following work tasks:

- + Concept development and development of special solutions
- + Development of turn-key solutions within industry 4.0
- + 2D/3D construction
- + Selection of components, sensors, and methods

### About you

We imagine that you have a sense of detail but can zoom out and see things in a larger perspective when needed. That you have an analytical mindset and good communication skills. That you thrive on having more balls in the air where you manage to make processes concrete and operational. We are a growth company where things go fast at times, so we therefore emphasize that you manage to prioritize the effort and maintain an overview.

You have a relevant education in quality assurance, CSR, environmental management, law or similar. It is also an advantage if you have professional experience in the field.

## What do we offer

Being yourself and having space for your personal life is important. That's why our work culture is built around flexibility. Prefer to work from 8-16? Or maybe from 10-11 and then again from 14-21? We're happy to accommodate what works best for YOU.

We work in teams assembled based on the specific project, so you'll collaborate with many skilled and diverse colleagues.

### In short:

- + A great work environment with humor in everyday life
- + Good and flexible working conditions
- + A focus on you and your personal preferences
- + Opportunities for further education and training
- + Close collaboration and sparring with experienced colleague

We offer you an exciting and forward-thinking workplace with a positive atmosphere, where there's plenty of room to be yourself.

## Who are we

At Technicon, we are driven by the ambition to create intuitive and user-friendly automation solutions for the pharma industry. We believe the best results come from the interaction between humans and robots – and, most importantly, from collaboration among dedicated colleagues. We are a team of curious, passionate specialists who value teamwork, knowledge sharing, and collective success.

Here, your ideas have room to grow, your skills are taken seriously, and you become part of a strong interdisciplinary community where professionalism and humanity go hand in hand. We don't just create unique solutions for our customers – we create a workday filled with job satisfaction, personal development, and professional pride.

## How to apply

You can apply by sending a traditional application and CV – but if you prefer a video application, that's very welcome too. Please send your application and CV to: [application@technicon.dk](mailto:application@technicon.dk)

We're conducting interviews on an ongoing basis, so don't wait too long to get in touch. If you have any questions about the position, feel free to contact our HR department at +45 29161012 or email [ldv@technicon.dk](mailto:ldv@technicon.dk)

We look forward to hearing from you!
